

Magra 4 for hazelnuts

Unit for hazelnut kernels which functions similarly to Magra 12. However, the smaller kernel dimensions allow 100% to be loaded into the unit. You can thus obtain 100% in your evaluation in a very short time.

Magra 12 for cocoa beans

50 cocoa beans or almonds can be cut into two halves in a simple, reliable manner in one operation without any risk of injury. The unit operates entirely mechanically and can thus be used everywhere. The cut halves are available within a few minutes for quality control and you can carry out a precise evaluation directly in the unit.
